

Screw LED Commercial Aquarium Lighting

Our new and patented Screw LED bulb fixtures are fully customizable in size and shape. The body parts are in our warehouse in 10 foot lengths, ready to be cut to size and assembled. Durable anodized aluminum and stainless steel construction, rubber gasket moisture seals, all glass protective LED lenses, drivers easily accessed in side rails. In the field repair, no need to send back to the factory. We can do up to 3000 watts in case you need to light the outfield of your favorite baseball stadium and they are fully Wi-Fi controllable and dimmable. There is nothing like this anywhere.
